

Multi-Modal Corridor **Project Additions** Relative to the 1996 Transportation Master Plan

The current Transportation Master Plan (TMP) update effort has taken a very detailed city-wide look at specific bicycle and pedestrian projects for inclusion in the Plan. The facility enhancement development process has evolved since the Bicycle System and Pedestrian Plan were identified in conjunction with the 1996 update. This process has identified numerous new projects to improve the multi-modal transportation network in Boulder.

Project Additions By Type:

Bicycle Routes

- Westview - Baseline to Arapahoe
- Central - loop north of Flatiron Pkwy.
- Spruce - 17th to 28th
